## Job Advertisement

### Key Information

**Company Name:** ENF Business Consulting

**Location:** Wuhu-China (<http://english.wh.cn/>)

**Compensation & benefits:**

Unpaid and flight costs not covered.

Accommodation provided within a shared apartment.

**Contract Period:** 6 months (5 days, 40 hours/week)

**Position:** Industry Analyst Intern

**Website:** [www.enfsolar.com](http://www.enfsolar.com)

### Company Background

Founded in 2005 on the commitment to accelerate the Industry, we are a fast growing renewable consultancy company with offices in UK and China. Our website can be read in English, French, Spanish, Italian, German, Chinese, Korean and Japanese.

We have a team of people accelerating the Photovoltaic Industry in many ways; our industry directory covers more companies than any other source in the industry; our market research team interview more companies than any other source in the industry and our jobsite will publish more jobs than any other source in the industry. In addition to that, we have launched a Jobsite that will focus on posting jobs in the Photovoltaic Industry from companies all over the world.

### Job Purpose

The job will be to work on ENF's industry directory. This will involve classifying companies by technology, dealing with technical information, promoting ENF's website among renewable websites, mapping out new types of technology to be added to the directory, helping to develop the directory's structure, and other tasks relating to the advancement of ENF's website. ENF's current solar PV industry directory can be found on our website [www.enf.cn](http://www.enf.cn). Wind directory plan is in a pipeline and will start very soon. The prospective candidate will work in both solar and wind directory.

### Required Skills

- Candidate must have completed Bachelor degree.
- Bachelor of Science is a plus.
- Good communication skills and good project planning abilities.
- Bilingual English speaker, Other European languages would be an advantage.
- Strong interest in technology and be able to demonstrate some level of understanding of the technology in your life (what is inside a computer, how the internet works, how mobile phones work etc.)

### Future Prospect

The internship will run for half a year and successful candidates will be offered a permanent position: if you do not intend to join us for more than the 6 months internship, please do not apply. The opportunities in the company include full-time analyst positions working on PV or wind technologies, or possibly positions in other departments if the

---

candidate shows strong abilities in business areas. For excellent candidates there is a strong potential for rapid career progression to management positions (potentially as quickly as 1-year from start of internship for outstanding people).

#### Information about Wuhu

- Wuhu is a small city by Chinese standards (2,000,000 people) and is not a tourist hot spot. This means that unlike Beijing and Shanghai there are very few foreigners around, if you are expecting to hang around solely with Europeans your options may be limited.
- In addition it also means there are very few bars and little night life. People hoping to go out drinking will be disappointed with the social options. On the positive side the city is well developed and clean. There are some global supermarket chains showing food labels in English, and large departmental stores and low prices which make shopping easy.
- It is a good place to learn Chinese and get an immersion into this culture.
