# Kursrapport: GG2008, Earth I - Geology 15 credits, HT16

---

Answer Count: 1

---

---

## 1. Course Director

**Course Director**  
Alasdair Skelton

---

## 2. Number of enrolled students

**Number of enrolled students**  
156

---

## 3. Number of students who completed the course

**Number of students who completed the course**

29 students started and completed the course in the most recent term. However, most students read this course at a slower pace. On average around 60% of students complete the course.

---

## 4. Changes in the course since the last time it was given

**Changes in the course since the last time it was given**

The course has not been changed since the last time it was given.

---

## 5. Course strengths according to the students (summary based on quantitative results, as well as free text)

**Course strengths according to the students  
(summary based on quantitative results, as well as free text)**

Students are generally positive about being able to read the course entirely at their own pace. They also find the course material fascinating. It is! Geology is a fascinating subject.

---

## 6. Course weaknesses according to the students (summary based on quantitative results, as well as free text)

**Course weaknesses according to the students  
(summary based on quantitative results, as well as free text)**

Some students find the course too challenging. Our aim is, however, for this course to be challenging. We allow students to read this course with "grundläggande behörighet". This is to allow not only natural scientists, but also students with backgrounds in social and human sciences to read geology. We cannot however make the course "easier". It must be at an appropriate level for first year studies at University.

Some students point out the need for updating of online lectures and (on the Swedish version), Swedish summaries. This is in my opinion a fair criticism. More "how to" videos have also been requested.

---

## **7. Conclusions and proposals for changes**

### **Conclusions and proposals for changes**

---

The online lectures and Swedish summaries will be updated during 2017.

---
