Request for review or correction of grade decision

A request for review of a grade decision must be **thoroughly motivated** in accordance with the grading criteria or expected results

NOTA BENE! It is the grade in the current grade scale which will be reviewed or corrected. There will be no new evaluation of your examination done. The examiner will always take extra precaution when deciding upon border line cases before the results are final.

The following examples of motivations are usually **NOT** sufficient for a review or change of grade.

1. I think that I should be given the same amount of points as that person because our answers are very similar.
2. Could you check if I could get a few more points since I am close to a higher grade?
3. I think I should have one more point on question X. Could you check my test again?
