I LOVED IT!!! SUPER FUN! BEST PART - IT WAS VERY FUTURISTIC

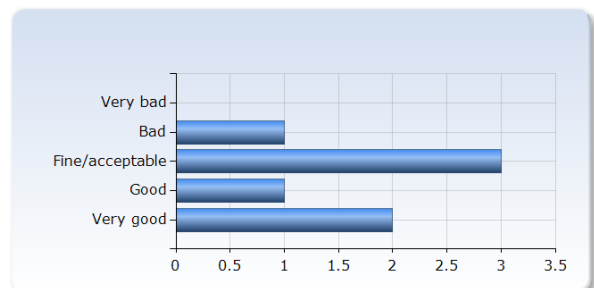

Expected more connection to the law

We weren't explained the basics, the course (except 2 personal data lectures and the idea with the app) was very surface level.

The course didn't inspire me to dig deeper into the topic (taking into account that I work in IT/IP for 3 years, it is hard to imagine). To me the whole point in choosing Stockholm university was the Cyber law course and I was very disappointed

In general seminars are bad (very useless surface level information)

What I want to highlight as an example of good seminars:

- 1st seminar with the ICT basics (but it could be shorter)
- the seminar with the app (it was cool to make something new and come across such a convenient app, but it could be made in 1 seminar, there was no need in 3 seminars!!)

7. Seminar 1: Legal Knowledge-based Systems with Taras Låvenberg

It was nice to work with a legal problem by yourself and develop an own tool

The instructions were very unclear and it was therefore quite difficult to decide what we have to do and do it. Additionally it wasn't really related to the reality.

10. Seminar 4 - Workshop: Preparing for the Opposition with Fredrik Sandberg

Some more information on the opposition itself would have been nice (what exactly is expected, do we need to make a presentation etc.)

I didn't get the idea of this seminar

11. 7. What are your thoughts about the *pre-recorded lectures* in general? Are there any lectures that stood out?

To be honest I didn't watch them

I didn't listen to them, I think I should, maybe they will change my review of the course

12. 8. What are your thoughts about the *live lectures* in general? Are there any lectures that stood out?

Some of the lectures were really great and I really enjoyed them. But some of them were super difficult and required more knowledge of IT and EU law in general

Standing out lectures - with practicing lawyers on PD topic

13. EXAMINATION

9. What are your thoughts about writing the essay?

EXAMINATION

9. What are your thoughts about writing the essay?

I really liked the topics and that we could choose what we want to write about. I think 10 pages was good, but for some topics you might need more space. Maybe it would be good to have another limit (10-12 pages).

big range of choice of the topic for the essay, it was a little bit difficult if you're not used to do it, but it was also interesting to visit the internet to look for answers. I think, also that the number of pages of the essay (10 pages) was perfect

It was a great experience and I learnt a lot.

14. 10. What are your thoughts about the opposition?

10. What are your thoughts about the opposition?

The time we had for the opposition (25min/person) was quite long, especially because I didn't really know what exactly is expected. But I liked the opposition in general and that it's only with one other person. Additionally I think that it should always more be like a discussion.

The opposition, was really interesting, more easy than I thought, it seemed like we were chatting between us about our works and giving opinion and cynicism about our essays.

I didn't get the sense of performing it orally. I liked the idea of peer review from my previous course

I learnt a lot, but I would have preferred to do a presentation about my own paper

15. FINAL COMMENTS

11. What was best thing about Cyber Law?

FINAL COMMENTS

11. What was best thing about Cyber Law?

I learnt some stuff about Cyber Law but not as much as expected, especially concerning the law. I learnt a lot about the GDPR but not that much about more international problems. It would have been nice to have some lectures about some "data scandals" and what exactly happened there (more case related).

the opposition

innovative

16. 12. Do you have any ideas on how to improve the Cyber Law course both as an online course but also as a regular course?

12. Do you have any ideas on how to improve the Cyber Law course both as an online course but also as a regular course?

see question 11

not really, i think the course it's really full of material and it doesn't need to add anything more , all the professors were always really helpful for any doubt of question, the instructions for any seminars, the essay and the opposition were very clear.

Seminars - please do something with that.

Right now I see only the lack of motivation from the tutors to make them substantial and usefull
