

Course report, Swedish for international students, course 1 period 1

1. Description of changes, and potential decisions already made to make such changes, since the course was last given.

No specific changes were made, even though the pandemic situation got better, we decided to give the course online instead of changing from Zoon to campus the last few times.

2 The strengths of the course according to the students.

(summary based on quantitative results, text responses from the survey and any other evaluation during the course)

Over all the participants seem to be satisfied with the course. Positive aspects mentioned are for example Learning Swedish, the teacher and the instructions, the quizzes and the course site. The teaching gave me good conditions to achieve the intended learning outcomes is one of the most highly rated questions.

3 The weaknesses of the course according to the students

(summary based on quantitative results, text responses from the survey and any other evaluation during the course)

Weaknesses according to the participants has to do with group size, the fact that the course was held online, as well as the activities in breakout sessions.

4 The teachers' analysis of the implementation and results of the course

When it comes to teaching the course will be given on campus this autumn. Perhaps this will clarify some aspects, such as structure and the size of the group. The teaching format for this course is 200-300 students, but in course 2-5 the groups are smaller.

5 Conclusions and suggestions for possible changes to the course and any decisions already made to develop the course.

Being back on campus it will be easier to develop the course. More teachers will work together on the course, and pedagogical discussions will be held more systematically.

6 Other comments

We are looking forward to seeing the students in person instead of in Zoom the next semester.
